direction.

3. The disposable diaper according to Claim 1, wherein said  
groove comprises a first grooves extending in said longitudinal  
5 direction across said crotch region into said front and rear  
waist regions and a second groove extending in said direction  
orthogonal to the first groove so that said first and second  
grooves intersect one another and said second grooves extends  
to transversely opposite side edge portions of said body fluid  
10 absorbent member.

4. The disposable diaper according to Claim 1, wherein said  
body fluid absorbent member is formed on the side of said  
topsheet with a third groove concaved in a direction from said  
15 topsheet toward said backsheet and extending in said  
longitudinal direction across said crotch region into said  
front and rear trunk regions.

5. The disposable diaper according to Claim 4, wherein said  
20 third groove is positioned substantially in the same position  
as conformity to that of said first groove.

6. The disposable diaper according to Claim 3, wherein said

- 18 -

body absorbent core is disposed between said backsheet formed with said first and second grooves and the topsheet opposed to said backsheet.

5 7. The disposable diaper according to Claim 4, wherein said body absorbent core is disposed between said topsheet formed with said third groove and the backsheet opposed to said to topsheet.

10 8. The disposable diaper according to Claim 1, wherein said body fluid absorbent member is detachably attached to said cover member.
